

Title

bradsto_dev — Stores estimates for use in Bradout

Syntax

```
bradsto_dev [, options] [: estimation_command]
```

<i>options</i>	Description
mlabel (<i>string</i>)	specify a label for the stored estimates; default is est#
prefix (<i>string</i>)	specify a prefix for the stored estimates; default is est
mgroup (<i>string</i>)	specify a group label for the stored estimates
clear	clear stored estimates

Description

bradsto_dev stores estimates for later use by **bradout**.

Options

mlabel(*string*) specifies a label for the stored estimates. The default name is **est#**, where # is the position of the saved model.

prefix(*string*) specifies a prefix for the stored estimates. The default prefix is **est**.

mgroup(*string*) specifies a group label for the stored estimates.

clear clears all stored estimates.
